Business & Stakeholder Management: Client Relationship Management, Stakeholder Engagement, Vendor Management, Client Presentations, Costing and Budgeting, Requirements Coordination, Business and Technical Alignment

People & Operational Leadership: Resource Planning, Capacity Management, Team Building, Team Mentoring, Cross-functional Coordination, Conflict Resolution, Process Improvement, Operational Management

PROFESSIONAL EXPERIENCE

ITC Infotech

December 2013 – Present

Senior Project Manager

Bengaluru, India

- Oversee multiple concurrent technology projects through the complete lifecycle: initiation, requirements analysis, effort and scope estimation, execution, monitoring and control, change management and closure.
- Prepare project management plans and project configuration management plans that establish the delivery framework for each engagement.
- Manage scope and track milestones and deliverables against agreed schedules.
- Provide weekly status reporting to stakeholders and manage their expectations throughout delivery.
- Coordinate interdependencies between project teams and business users to keep work aligned.
- Govern change requests through the defined change request process, tracking each to closure.
- Identify risks from project inception and manage them through mitigation and contingency plans.
- Resolve issues and conflicts between team members through interpersonal and managerial skills.
- Define delivery best practices and drive team adherence to them.

Torry Harris Business Solutions
August 2005 – November 2013
Project Manager
Bengaluru, India

- Directed project management, resource management and execution for multiple clients across the APAC and MEA regions.
- Planned resources and capacity across regions, aligning varied skill sets to project needs.
- Delivered multiple enterprise integration projects for a large automobile client, connecting dealers, customers and suppliers with technically diverse teams.
- Planned go-live and deployment into live environments, supported by detailed deployment guides.
- Managed post-go-live activity, including change requests, enhancements, and support and maintenance.
- Monitored SLAs on support projects to prevent breaches, and reviewed daily, weekly and monthly status reports.
- Presented weekly and quarterly status to senior management and project stakeholders as part of steering committee meetings.

Automated Workflow
April 2000 – July 2005
Technical Consultant & Lead Developer
Bengaluru, India

- Participated in presales and proof-of-concept activities, demonstrating working models to clients.
- Contributed to requirements understanding, solution design and development as a key member of project teams.
- Provided solution leadership as lead on multiple projects.
- Progressed from developer into a technical consulting and lead role, serving customers in India and the APAC region.

Automated Workflow
February 1998 – February 2000
Developer
Bengaluru, India

- Began IT career as a FoxPro and Visual Basic developer.
- Completed programming assignments and software testing for small-sector industries.

CAREER HIGHLIGHTS

- Led and coordinated multidisciplinary teams of business analysts, architects, developers and test engineers across technical, financial and business disciplines.
- Developed project roadmaps, schedules and work breakdown structures.
- Managed project risks, dependencies and change requests.
- Delivered enterprise integration initiatives involving dealers, customers and suppliers.
- Maintained stakeholder reporting and steering committee participation.
- Managed international projects across APAC and MEA, including delivery planning and post-go-live coordination.

CERTIFICATIONS

- **Certified ScrumMaster® (CSM)** – Scrum Alliance, September 2025 (active through September 2027)
- **Project Management Professional (PMP) Training** – Certificate of Achievement, PMI Authorized Training Partner (RPS, an NIIT subsidiary), January 2025
